## Belt description

The DKT50-220 is a strong, straight running and positive driven conveyor belt, especially designed and engineered for the food processing industry. The perforated deck has an opening of 3 x 3,5 mm with an open surface of 20 %, thereby being best suitable for the transportation of vegetables, meat, fish, and fruits where drain with small openings are required.

Although by default only flights are optional with a height of 25 mm, 50 mm, 75 mm, or 100 mm, the belt be configured in a hybrid solution for extra options, strenght, and durability. With the hybrid configuration, the belt can be adjusted to support side and/or centre chain(s), side plates, custom flights, and guide blocks.

For more information regarding setup, possibilities, customization and options feel free to contact us!
